

ESG Manager

Location: Bratislava, Slovakia

We are thrilled to be expanding our team at SmartHead and are seeking a talented and experienced ESG Manager to join us on our mission. As our ESG Manager, you will be responsible for assessing and analyzing the environmental, social, and governance (ESG) trends and opportunities for our software development. As an ESG Manager, you will play a key role in analyzing ESG risks and opportunities, developing ESG strategies, and communicating ESG concepts to a wide range of stakeholders.

We are looking for someone who is passionate about sustainability and has a deep understanding of ESG frameworks and best practices.

About SmartHead Co. and the team

We are a professional team working in the field of corporate sustainability and ESG with a drive, solid company's values and fully committed to fulfill our vision and mission.

Vision: A world in which 100% of businesses act in a sustainable way.

Mission: We provide companies with a tool that allows an easier, faster, and more effective transition towards sustainability. That is why we provide a professional software tool that allows companies to centrally manage, track, report complex sustainability and ESG data and communicate it to stakeholders all from one place.

Both team spirit collaboration and an individual drive, self-motivation are important for us. We keep an open and transparent communication and mind and constantly work towards continuous development of the team and the SmartHead product.

Responsibilities

- Creating sector and market surveys and studies focused on ESG topics and frameworks
- Participation in activities aimed at developing business opportunities and presenting the company on the market (webinars, events, conferences)
- Participation on meetings with potential or existing clients and partners
- Continuous education in ESG and sustainability topic
- Analyzing the new trends and bringing new ideas for the ESG software development
- Consultations with clients regarding ESG topic
- Being in charge of the certification processes and help to shape SmartHead ESG internal strategy
- Writing professional articles on ESG topics

Requirements:

- Fluent level of English
- You have experience in ESG and sustainability topic (knowledge of ESG frameworks such as GRI, ESRS, SASB, ISSB, TCFD, etc. is a big plus)
- Ability to multitask and thrive in a fast-paced environment
- Ability to meet deadlines under pressure
- Ability to work individually but being a good team player as well
- Strong written and verbal communications skills
- Take a team-centric approach to work
- Have a natural desire to take on new initiatives and stay on top of ESG trends

About benefits:

- Fixed salary (according skills and experience) and bonuses for achieved KPIs of company
- Opportunity to shape own innovative strategies in growing company backed by Venture Capital firm
- Flexible working hours
- Possibility of home offices
- Work-life balance with flexible working hours
- Work with a meaningful purpose (advocating sustainability in business)
- Be a part of professional and dedicated team
- Dedicated time for individual training
- A friendly and informal working environment
- Well-being office environment and work from the BREEAM Communities certified (Excellent level) building
- Opportunities for growth and advancement within the company
- Team building activities
